

# APPENDIX

**FIGURE A1** Distributions of meetings, calls, and participants by operation

Note: 'Participants per Call' were omitted, as most calls involved only two participants.

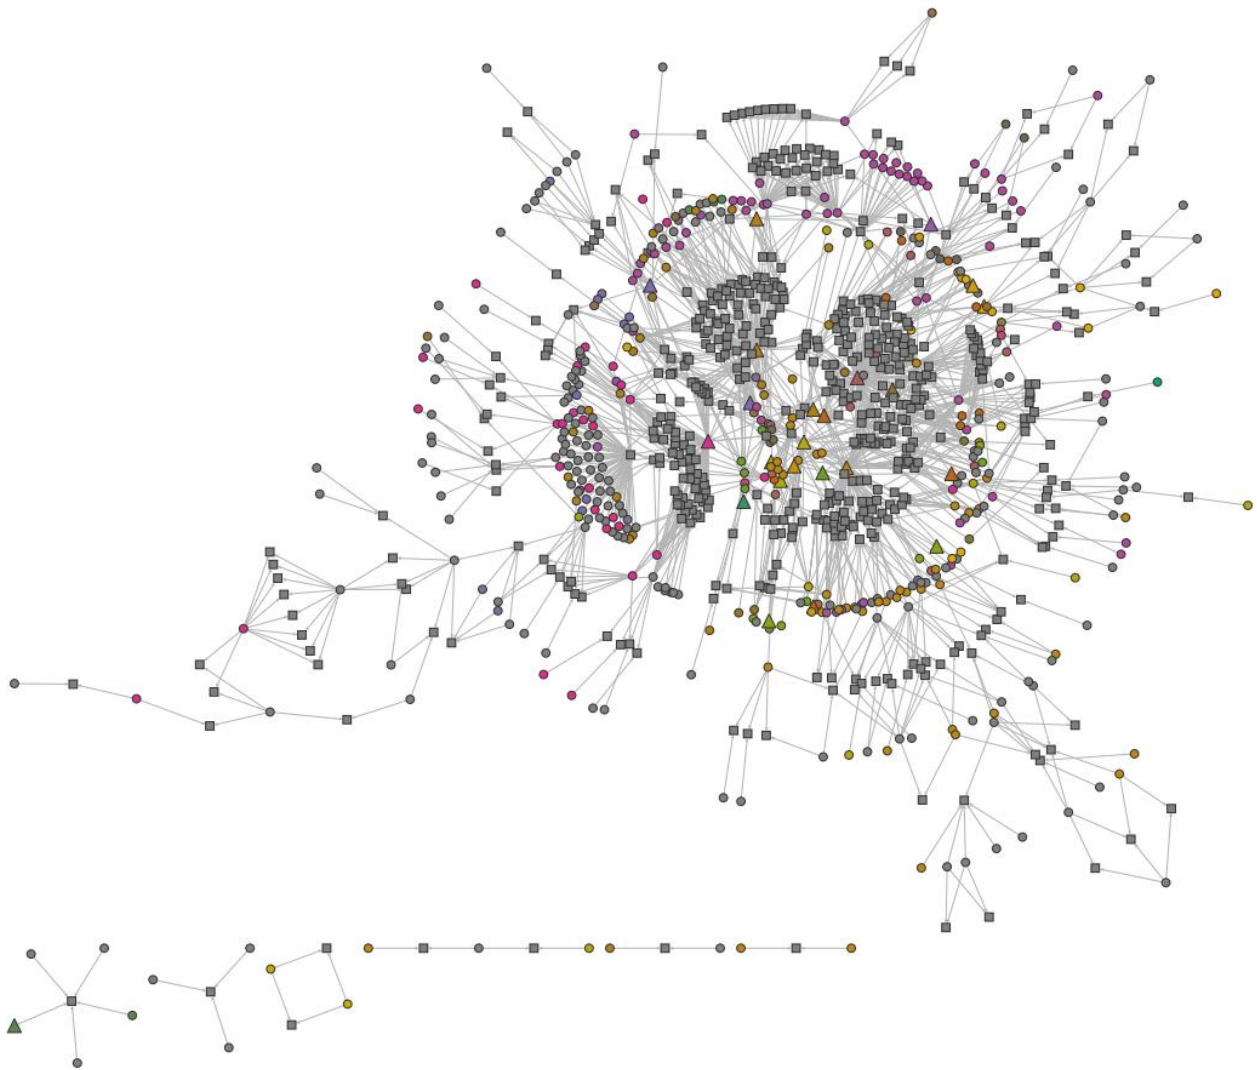

**FIGURE A2.** Quarterly distributions of events by operation

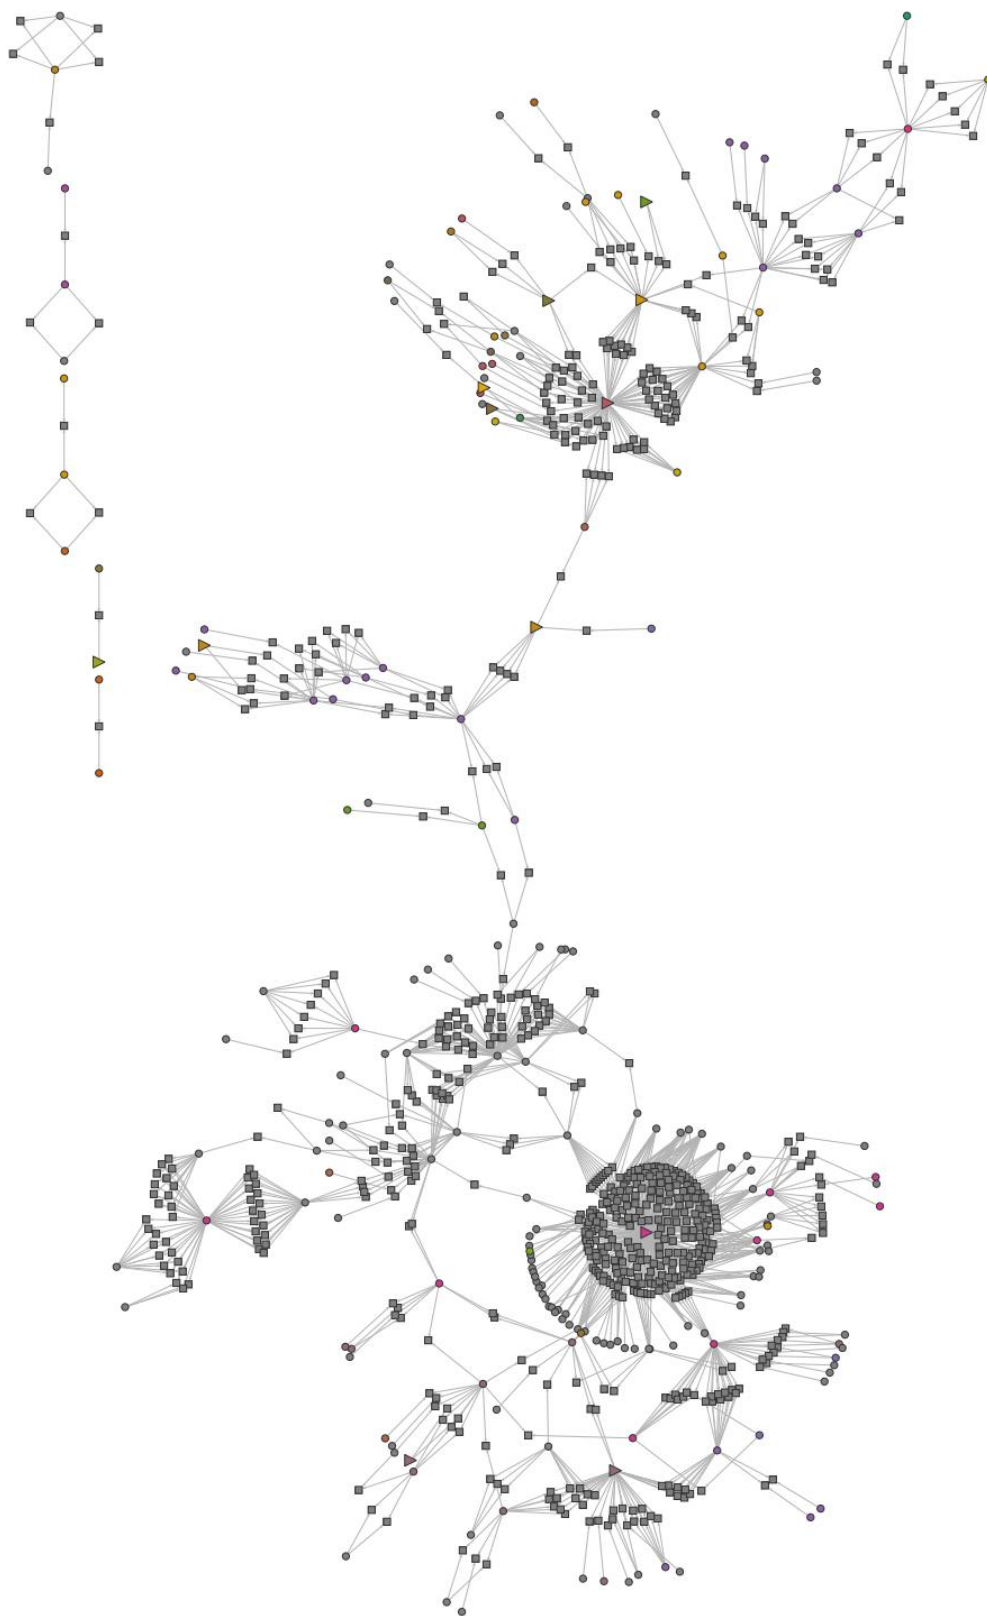

Note: Excluded 4 meetings occurred in 1997-1998 to improve readability

The following Figures report two-mode visualizations of actor-event networks. Events (meetings or phone calls, respectively) are represented as square nodes. Actors (triangles for leaders, circles for non-leaders) are connected to the events they participate in. Actor color represents *locale* membership (gray for non affiliated, unknown affiliation, out of scope *locale*).

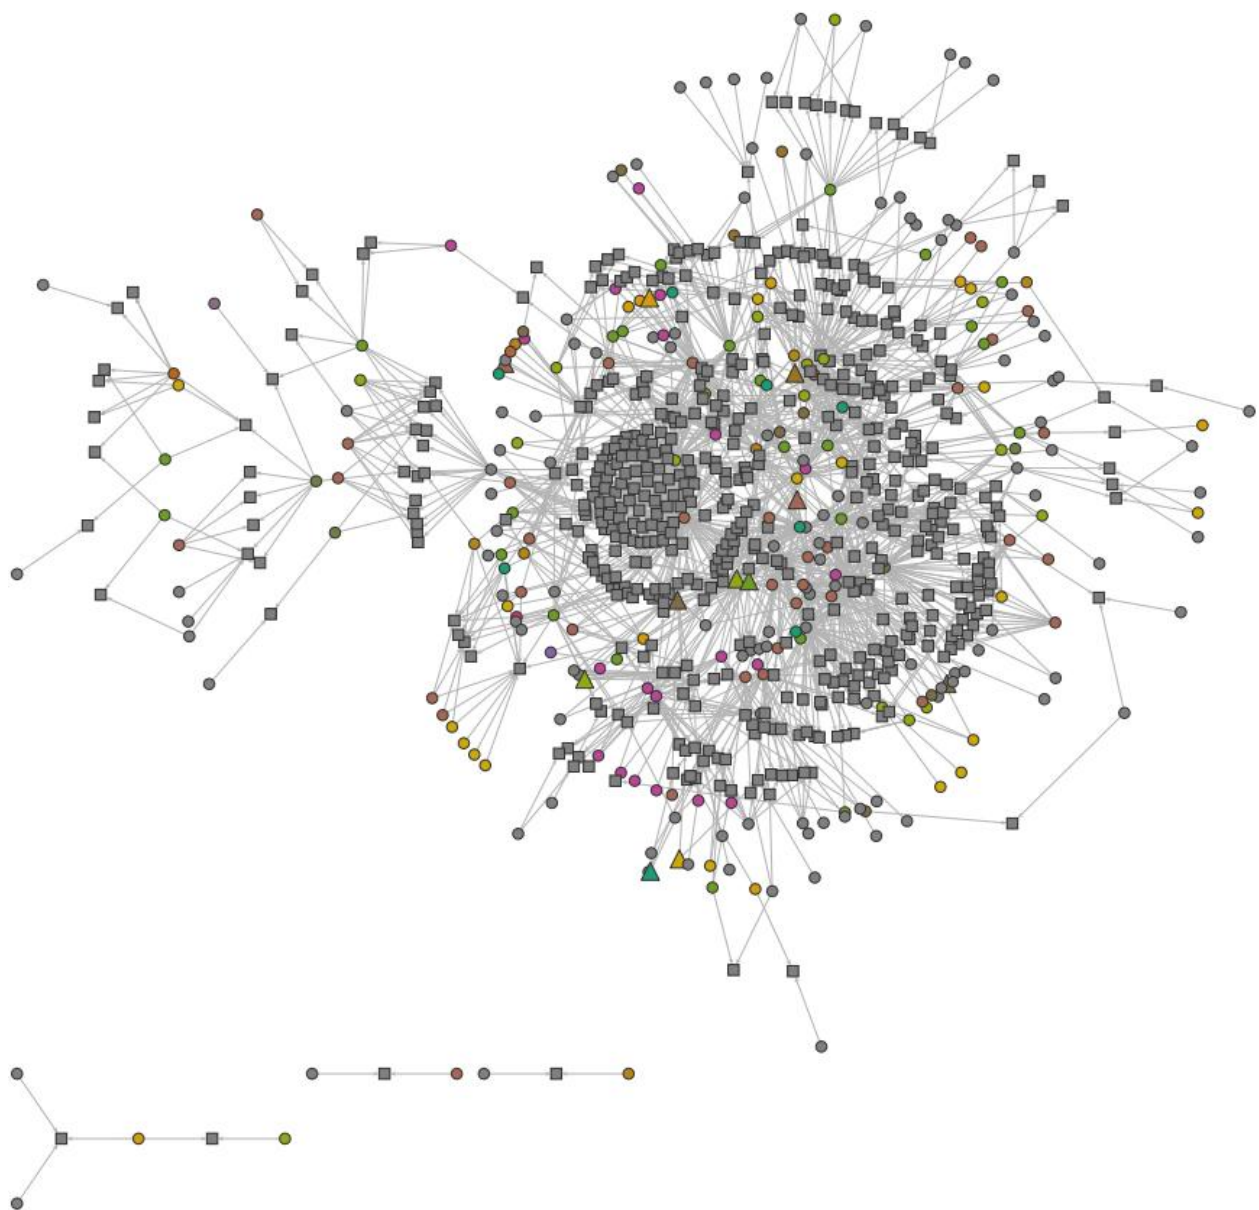

**FIGURE A3** Bipartite graph of meetings, Crimine

**FIGURE A4** Bipartite graph of calls, Crimine

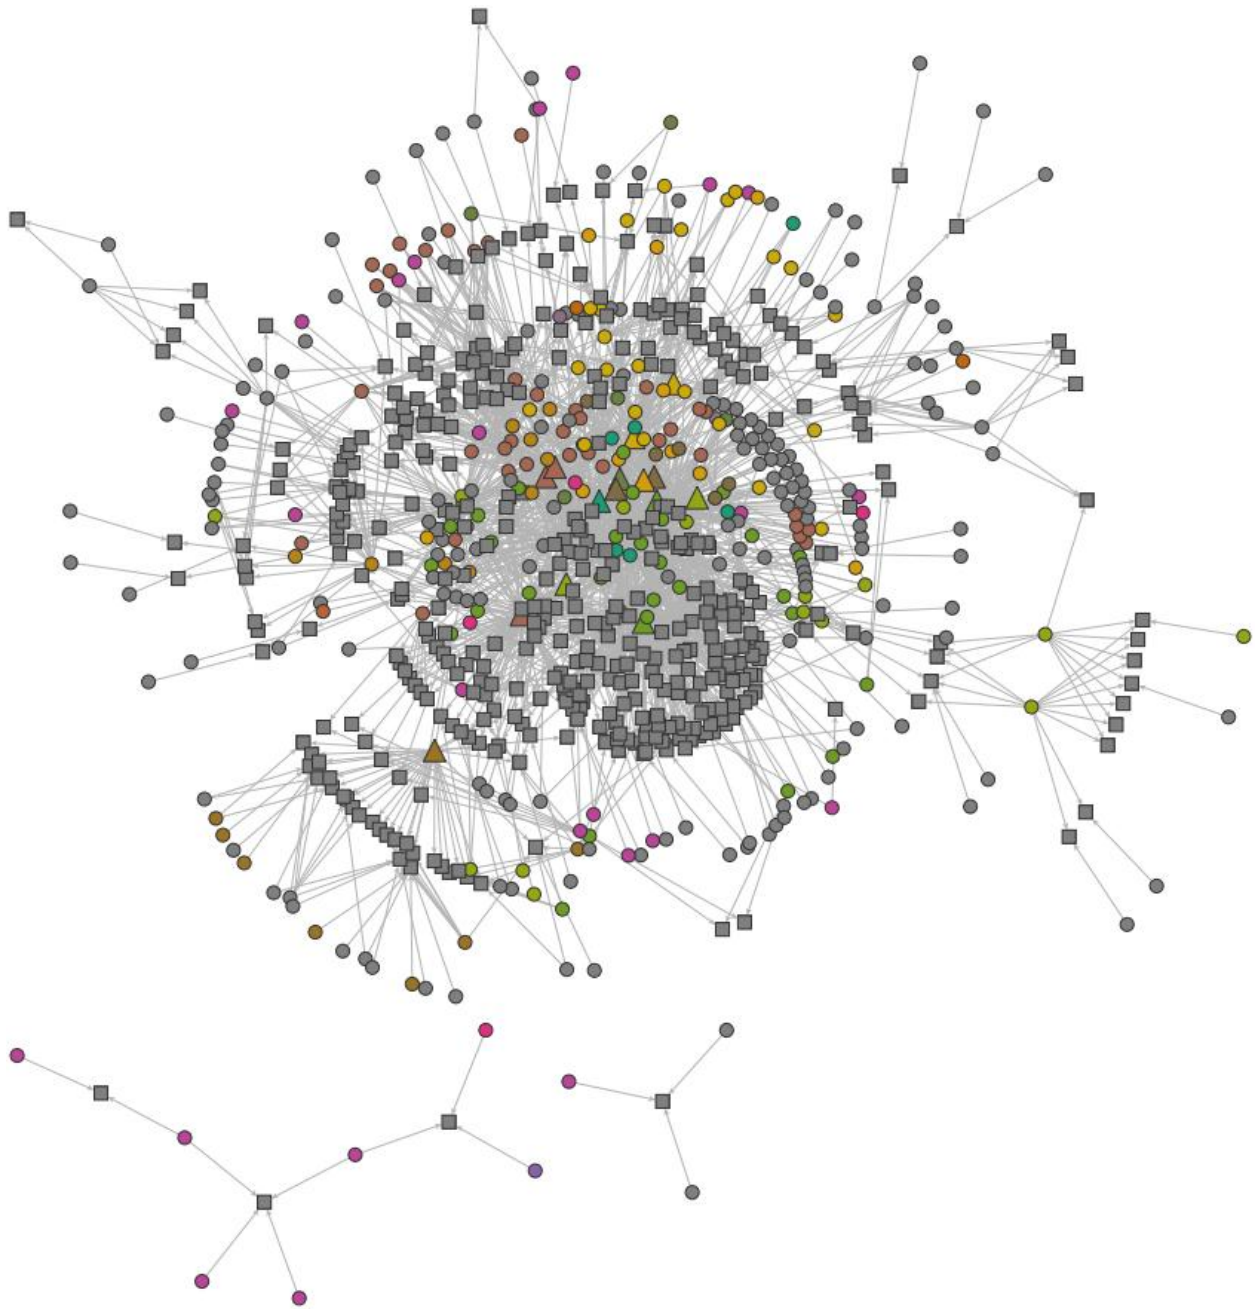

**FIGURE A5** Bipartite graph of meetings, Infinito

**FIGURE A6** Bipartite graph of calls, Infinito

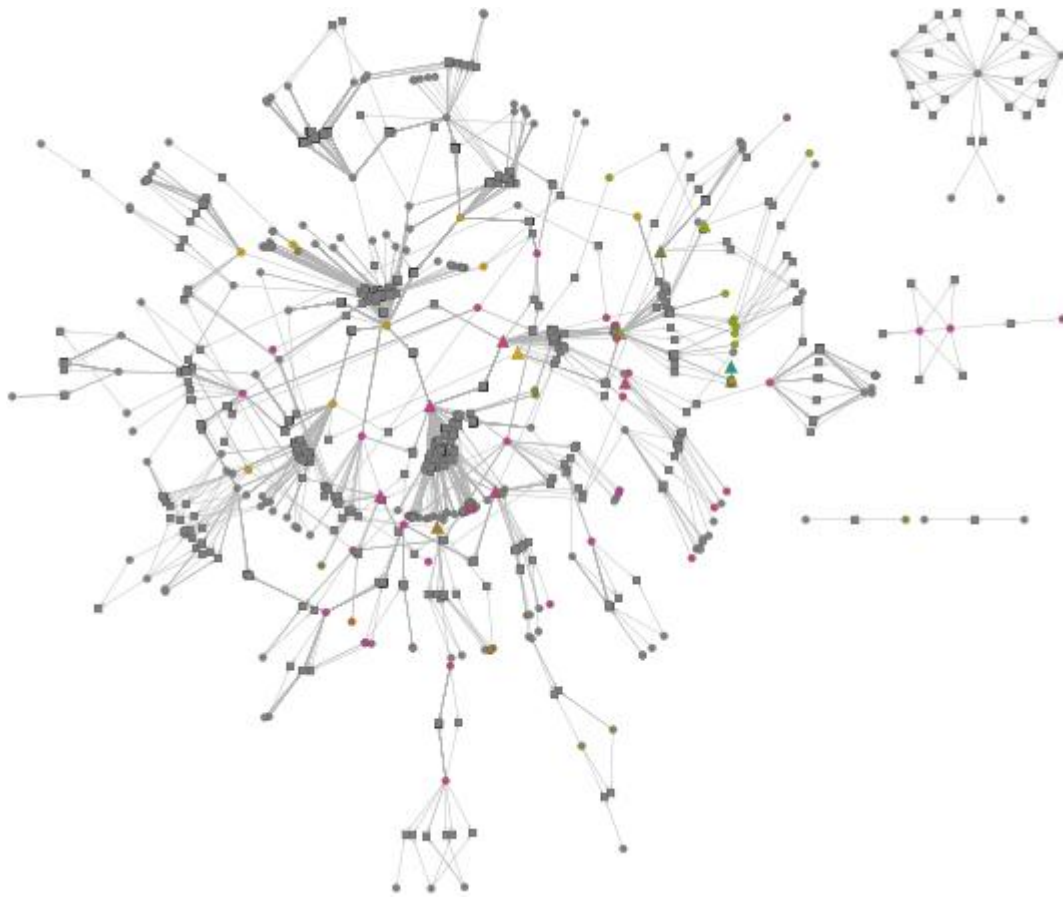

**FIGURE A7** Bipartite graph of meetings, Minotauro

**FIGURE A8.** Bipartite graph of calls, Minotauro

**TABLE A3** Descriptive Statistics of Explanatory Variables Used in the RHEM Models.  
Minotauro

| Variable                      | min  | 25%  | median | mean | 75%  | max    | sdev  |
|-------------------------------|------|------|--------|------|------|--------|-------|
| <i>Minotauro (meetings)</i>   |      |      |        |      |      |        |       |
